

Continue to monitor your water consumption patterns and be aware of the potential for leaks. Outside leaks can go undetected for long periods of time and a running toilet may consume several cubic meters of water. This can result in a large water bill. **Township policy does not provide reductions to water bills due to leaks.** The property owner is responsible for all water that is calculated by the water meter.

Please ensure that your water pipes and meter are protected from freezing. The property owner is responsible for all parts of the system on private property which is beyond the curb stop/shut off valve.

New Water Rates effective January 15, 2023

\$2.02 per cubic meter

\$45.50 Administration fee per billing

0.30 cents per cubic meter for hydro for customers in the LaSalle pump station area

\$126.00 sewer charge per billing for customers in Oil City

Water Bills due dates in 2023: February 28, June 30 and October 31, 2023.

Notices for Water Meter Repairs

Notices are mailed after each reading cycle to customers requiring repairs or replacement of a water meter or remote. If you received a notice or receive a notice in the future, please contact the municipal office at 519-882-2490 to make arrangements for the specified repair or replacement. Your cooperation is greatly appreciated.
